

2019 Coroner Report

Submitted by: Coroner John Gulino

Greene County Coroner

My duties as corner are that of responding to the place of death and observing the situation at hand. From this observation I ask certain questions of the police agency at the scene. These questions pertain to the deceased's medical history and a list of doctors that have treated and attended the deceased. From this information obtained, I then consult with the Medical Examiner to see if an autopsy is something that should be performed. Enclosed, please find a list of cases (without names) that include gender, the date that my services were performed and cause of death.
